Event Details

The session covered how to keep highway operations safe, compliant, and running strong during the winter season. It brought together three critical areas for highway leaders, offering practical information to help protect crews, meet workplace requirements, and strengthen teams.

- **Plowing Safety**: Covered the challenges of winter operations, with a focus on plowing safety, driver fatigue, and preventing slips, trips, and falls.
- **VOSHA Compliance**: Reviewed the prioritized VOSHA standards commonly affecting municipal garages, including Hazardous Energy Control, PPE Assessment, trenching, HazCom, machine guarding, eyewash and first-aid requirements.
- **Managing the Highway Team**: Introduced a practical framework for performance management and provided tools to help build stronger, better-functioning highway teams.

Participants walked away with practical knowledge they could put to work in their highway operations, from keeping their crews safe and compliant to effectively managing the teams that keep their communities moving.

November 2nd and November 4th Slide Deck(opens in a new tab)
