

Grant Basics Recordings and Resources

This multi-part series from our Municipal Operations Support team provides a practical, large-scale perspective on the phases of preparing for, pursuing, writing, and implementing grants. It also provides perspectives and tips from funders. Each session begins with a presentation then transitions to a participant Q&A where attendees ask questions of the presenter(s).

February 4: Funders' Advice for Success

April 1: Before the Grant

June 3: Project Development and Funding

August 5: The Application

October 21: Grant Management

Grant Basics: The Application

Now that securing a grant award has become more competitive than ever, developing your grant application strategically greatly improves your chances of convincing funders that your project is worthy of their funding. Grant writing requires understanding what funders want to see in projects as well as applications. Whether you are preparing to apply for a grant, are writing the actual proposal, or just received notice that your application was not successful, this webinar will help you set yourself up for future success.

Participants joined VLCT's Municipal Operations Support staff to learn about grant applications and strategies for success. Topics included:

- Understanding the grant landscape and how it had changed
- What to know about grants and how they worked
- What funders wanted and didn't want to see in an application
- Tips and tricks to make your grant writing experience easier and your proposals more competitive

Presenter:

Bonnie Waninger, Project & Funding Specialist, VLCT

Grant Basics: Developing and Funding the Project

Transforming an idea into a well-developed project plan is essential for winning grants because funders and voters want projects that are realistic, viable, and sustainable. Project development helps ensure you know what resources are needed to build, operate, maintain, and eventually replace a grant-funded project. It identifies red flags, builds a realistic timeline and budget, and aligns

expectations among stakeholders.

Learn about project development and ways to fund your project. Topics include:

- The project lifecycle and the products that help move you toward grant success.
 - The important role of capital stacks in the project's funding package.
 - What to know about grants and how they work, including what funders want to see in an application.

Grant Basics: Before the Grant

Setting priorities and selecting the right projects are cornerstones for winning grants. Successful projects are built on the pillars of strong leadership, communication, organization, coordination, and partnership. Use this training to learn how to implement these pillars while turning ideas into successful projects.

- Gather ideas, set priorities, and select project concepts

- Establish roles and responsibilities that set your project up for success
 - Create a project team to harmonize communication and avoid surprises
 - Find help when you have a capacity gap
 - Understand project and grant readiness
-
