IRS Help Available for Claiming Energy Tax Credit

The IRS is offering office hours (through Microsoft Teams) to help entities with the pre-filing registration process on the [Pre-filing Registration Tool](#).

Pre-filing registration is a required step for applicable entities, like municipalities, to take advantage of elective payment of certain credits, such as renewable energy generation, EVs, and EV charging infrastructure. Representatives from the IRS will be available to answer your pre-filing registration questions.

Registration for office hours is open. **Registration is required** and can be completed by clicking on the links below.
