## **Integrated Property Tax Management and Grand List Software Vendor Selected**

The Vermont Department of Taxes has selected Axiomatic LLC of Portsmouth, N.H., to develop the State of Vermont's modernized statewide Integrated Property Tax Management and Grand List Software. The department will work with Axiomatic, local officials, and partner vendors to develop a new platform that will save time and money and provide greater insights and utility to state and local officials.

In the initial phase of the project, the department and Axiomatic will collaborate remotely. Towns will not immediately have to do any additional work at a time when they are managing responses to COVID-19.

The final selection was a result of a rigorous evaluation process. Throughout this project, the department solicited input from local officials. An independent review of the system also anticipates increased accuracy, improved customer service, greater system reliability, data security and privacy.

The total cost of the five-year project, which is expected to launch in late 2021 and early 2022, is \$1.6 million. Please visit the [Integrated Property Tax Management System webpage](#) <sup>[1]</sup> for more information and guidance, including project updates, timelines, and Frequently Asked Questions.

The selection of Axiomatic was influenced by their subject matter expertise, strong recommendations from their state clients and local assessing officials, and understanding of the needs of Vermont town and state users. The usability and support for town officials have been our first priority, and we are confident state and local officials will see great improvement in their interactions with our division and this product.

In partnership with the Vermont League of Cities and Towns, PVR will be hosting informational webinars for town officials on April 29 and 30. Registration information will be forthcoming.
