Remote Work Cybersecurity

This page features materials from Sherri Davidoff, CEO of LMG Security, a business partner of Beazley Insurance, Inc., from which PACIF obtains cyber security coverage.

Davidoff's complete April 15, 2020 webinar "Remote Work Cybersecurity" starts with a look at the vulnerabilities revealed when thousands of workers quickly began working remotely in response to the COVID-19 pandemic. It goes on to explain how **the humans setting up and operating the systems need to implement proper control over these systems to make them safe**. Four additional checklists are included here to help PACIF members ensure the security of their computers and data systems.

Additional links below include [Remote Working Best Practices](#) [1], a human-focused webinar that PACIF hosted for employees in April of 2020.
