

PACIF Property Appraisals and Boiler Inspections

June 12, 2020 – Beginning next week, UIS, PACIF's property appraisal vendor, will begin to contact PACIF members to schedule property appraisal surveys. All UIS consultants reside in Vermont or come from bordering counties with low COVID-19 incidence rates; hence, they are currently excluded from quarantine requirements.

Additionally, Todd Templeton, Risk Control Engineer for PACIF partner Travelers Boiler & Machinery, will also resume his inspections of pressure vessels and related equipment as soon as next week.

In both cases, inspectors will use masks and follow social distancing standards. If you have any questions regarding the resumption of these services, please contact losscontrol@vlct.org [1].
