EYEMED MEMBERS HAVE IT MADE IN THE SHADE

Too much sun can damage your eyes
You might have heard that UV rays cause cataracts, macular degeneration and vision loss. All true. But eye sunburn? Even in the winter? Yep, that’s a thing, too.¹ You should avoid it.

Sunglasses: sunscreen for your eyes
The good news is that sunglasses can easily block the sun’s harmful rays – 99% of them, in fact. With the right pair of dark specs, you can safely soak up the sun. All you have to do is look fabulous.

Since you’re an EyeMed member, you get cool savings on cool shades with $20 off, or $50 off your purchase of $200 or more at Sunglass Hut™. Most pairs, most brands, most styles. Go ahead, get shady.
