

# BIG INFRASTRUCTURE GOALS?

## Meet the **Local Infrastructure Hub.**

### SOLUTIONS THAT SCALE.

The Bipartisan Infrastructure Law has provided cities with unprecedented opportunities to apply directly for federal funding. However, amid shifting priorities and evolving administrative requirements, many cities still face challenges—particularly limited staff capacity and technical expertise—which can hinder their ability to compete effectively for grants or maintain compliance to retain awarded funds.

Through the Local Infrastructure Hub, municipalities can access a comprehensive suite of expert support to apply for and implement grants—including pro-bono technical training through Bootcamps and Workshops. Over the past eight Bootcamp series, the Local Infrastructure Hub has supported 1,240+ cities with 150,000 residents or fewer navigate the federal grant application process, and is working with more than 2,470 localities overall across all of its program offerings, including virtual webinars and learning opportunities available for cities of any size.

To date, over 420 participating cities have secured over half a billion dollars in federal grant funding.

### ACTIVITIES AND RESOURCES.

#### Bootcamps

Bootcamps are multi-week, cohort based programs that guide cities through the full application development process. Participants have access to subject-matter experts, data resources, office hours, individualized coaching sessions, and peer-to-peer learning to engage with experts and other applicants from peer cities going through the same program.

#### Workshops

Workshops are intensive, half-day sessions focused on targeted, grant-specific training. Cities will build core application skills, understand eligibility criteria, and navigate requirements related to applying for or implementing federal funding opportunities. These offerings will provide communities with the tools, guidance, and peer support they need to build robust and competitive federal grant applications.

In addition to live learning sessions, participants in Bootcamps and Workshops will receive access to templates, example submissions, and other supports.

# UPCOMING PROGRAMMING:

## Bootcamps

Grant Implementation, Compliance and Management: Cities without extensive federal grant experience often face a steep learning curve when it comes to implementation. To support them, we are offering a bootcamp designed to equip city leaders with the practical skills they need to deliver federally funded infrastructure projects covering procurement, federal compliance, and streamlined grant reporting. To enroll in this bootcamp, your city must have been awarded an infrastructure grant from a federal agency since 2022. [Register here](#)

## Workshops

Combined Railroad Crossing Elimination (RCE) and Consolidated Rail Infrastructure and Safety Improvements (CRISI): Combined Railroad Crossing Elimination (RCE) and Consolidated Rail Infrastructure and Safety Improvements (CRISI) grant programs support infrastructure upgrades to improve safety and mobility at rail crossings. This workshop will help cities navigate RCE/CRISI applications, aligning local rail safety goals with eligible projects like track relocation, protective devices, and environmental audits. **This workshop will take place on Sept. 11, 2025 at 12:00 PM E.T.** [Register here](#)

Inflation Reduction Act – Elective Pay: The Inflation Reduction Act's (2022) Elective Pay provision enables non-taxable entities to receive direct payments in lieu of tax credits when investing in clean energy projects. This workshop is tailored for cities with completed or in-progress projects in eligible areas like clean energy generation, battery storage, EV charging, or zero-emission vehicles. Participants will learn how to file for Elective Pay tax credits, secure cross-agency support, and maximize financial and community benefits under this fast-moving opportunity. **This workshop will take place on Sept. 25, 2025 at 12:00 PM E.T.** [HYPERLINK "https://localinfrastructure.org/application-bootcamp/#ira"](https://localinfrastructure.org/application-bootcamp/#ira) Register here

Brownfields Program (Assessment, Cleanup and Multipurpose Grants): Brownfields program funds may be used to address sites contaminated by hazardous substances, pollutants, or contaminants. This workshop will help cities understand how to apply for types of grants that allow communities, states, tribes and others to assess, safely clean up and sustainably reuse contaminated properties. **This workshop will take place on Oct. 2, 2025 at 12:00 PM E.T.** [Register here](#)

Safe Streets and Roads for All (SS4A): The Safe Streets and Roads for All (SS4A) program provides funding to prevent roadway fatalities and serious injuries. Cities can use this funding to develop safety action plans, redesign high-risk corridors, or implement infrastructure improvements like sidewalks and crosswalks. This workshop will explore how local governments can apply SS4A Planning and Implementation funding to advance roadway safety and address the needs of all road users. **This workshop will take place on Dec. 11, 2025 at 12:00 PM E.T.** [Register here](#)
